

**Marcos Unis, DVM, MS, DACVS**

**Department of Surgery**

Dr. Unis graduated in 2007 with a Doctorate in Veterinary Medicine and a Masters in Veterinary Anatomy. His academic surgical training took place in several of the top veterinary colleges in the country including North Carolina State University, University of Illinois and Kansas State University.

While in academia he had the privilege to be trained by some of the top veterinary specialists in their fields. During his training he specialized in advanced orthopedics, soft tissue surgery, oncologic surgery, neurosurgery and minimally invasive surgery.

After completing his surgical residency at Kansas State University in 2011 he became a board-certified veterinary surgeon in 2012. He then left academia for private practice in Southern California, where he practiced for five years before moving to South Florida. With a passion for teaching, Dr. Unis has trained many surgery residents and interns over the years. This includes conducting numerous continuing education seminars in advanced orthopedics, neurosurgery and minimally invasive surgery. He also lectures both nationally and internationally in various areas of specialty veterinary surgery.

Dr. Unis is well known for his compassion, professionalism, attention to detail, research knowledge and his diverse surgical experience.

Dr. Unis loves what he does and takes pride in his work. He has a unique ability to make clients feel at ease, taking the time to explain all aspects of the surgery, so that the family will have a good understanding of the procedure for their loved ones. Dr. Unis is one of the few surgeons in the country who is Masters certified in the newest cementless titanium total hip replacement system. He is most passionate about minimally invasive surgery and joint replacements, as well as any new techniques that will minimize discomfort from surgery and provide the safest and fastest recovery.
